BUILD WITH PURPOSE

JRA Green Building

SUSTAINABLE NORTHWEST WOOD is the bridge between responsible forestry, beautiful local wood products and your building project. Our mission is to foster a wood products community where each purchase for the built environment ensures resilience in the natural one.

PLACE From FSC® certified woodlands in Oregon and Washington to the sunny hillside slopes of the Rogue Valley, the Pacific Northwest's fertile forests provide the lumber for our wood flooring. The mineral content in the soil imbues these woods with rich colors, dramatic veining, and beautiful variation in the grain.

PURPOSE All of our Northwest flooring is sustainable, fully renewable and designed to provide decades of performance. Each flooring purchase supports a network of local land owners, sawmills, and fabricators right here in our region.

PEOPLE We partner with mills throughout the Northwest to cut and kiln-dry the lumber and manufacture our flooring, supporting the resilience of Pacific Northwest forests, our local economy and communities.

SPECIES & JANKA RATING FSC® Bigleaf Maple (850), Campground Blue Pine (460), FSC® Douglas Fir (660), Myrtlewood (1270), Oregon White Oak (1660), Pacific Madrone (1460), Restoration Juniper (626), Tanoak (1420), and Willamette Valley Walnut (1010)

Matching stair treads, risers, trim & vent covers are made to order. Ask one of our wood enthusiasts for details.

Forest Stewardship Council® Certified since 2008
