**HIGH PERFORMANCE - HEALTHY PEOPLE - HEALTHY PLANET**  
**SOURCING: TIMBER-HP MADISON, MAINE**  
**THERMAL BARRIER - ACOUSTIC COMFORT - FIRE RESISTANCE**

# LOCAL WOOD FOR THE GREATER GOOD

**SUSTAINABLE NORTHWEST WOOD** is the bridge between responsible sourcing, innovative wood products and the built environment. Our mission is to foster a wood products community where each purchase for the built environment ensures resilience in the natural one. Wood fiber insulation is for the next generation of building.

## PLACE

Sourced from TimberHP and manufactured in Madison, Maine at the former home of a shuttered paper mill. In a region where the economy was tied to the declining paper industry, TimberHP is breathing new life into rural manufacturing and helping create a market for small diameter pulp trees and residual wood chips from milling activities to make their wood fiber insulation products.

## PURPOSE

**TimberBOARD** is a rigid exterior continuous insulation for wall, floor, and roof applications offering superior carbon storage, moisture management and compressive strength with a Class B Fire Rating. **TimberBATT** is a flexible, high-density wood fiber batt insulation engineered for superior thermal, acoustic, and moisture performance in modern assemblies with a Class A Fire Rating. Helps meet ambitious energy, health and sustainability goals for residential, multifamily and commercial building projects.

## PEOPLE

No VOCs, formaldehyde or added toxins promotes healthier indoor air quality. *Red List Free*. Safe to handle and install, vapor open and breathable, reducing the risk of condensation, mold and rot. Utilizes undervalued logs and wood chips from the collapsing paper pulp industry, providing jobs for displaced workers.

## AVAILABILITY

TimberBOARD in stock 4'x8' 1.5" to 9.25" thick  
TimberBATT in stock 15" x 47" 3.5" to 7.25" thick  
24 O.C. and steel frame products available by special order.
