BUILD WITH PURPOSE

SUSTAINABLE NORTHWEST WOOD is the bridge between well managed forests, beautiful local wood products and your building or remodeling project. Our mission is to foster a wood products community where each purchase or the built environment ensures resilience in the natural one. YOU are part of that community!

PLACE All of our wood is responsibly sourced throughout the Northwest from small woodland owners, Tribal lands, salvaged from the forest harvesting wastestream and ecosystem restoration projects, or from FSC Certified forests and mills. Zena EdgeGrain™ is manufactured by our friends at Zena Forest Products in the Willamette Valley and can be seen at Portland International Airport. It is the only product of its kind made in the U.S.

PURPOSE Zena EdgeGrain™ is sustainable, renewable and designed to provide decades of beauty and durability. This innovative product utilizes smaller pieces of wood and off cuts, making better use of the tree, and dramatically reducing wood waste. Durable enough for high-traffic commercial and residential flooring projects, it also makes beautiful wall and ceiling cladding. This eco-conscious, solid wood product is made without adhesives, and is ideal for LEED and Living Building Challenge projects.

PEOPLE We work with land stewards, local Tribes, and small businesses around the region, and partner with family-owned Zena Forest Products to manufacture this product. Collaborations like this support the resilience of Pacific Northwest forests, our local economy and the rural communities where our wood is sourced.

FEATURED SPECIES Campground Blue Pine, Pacific Madrone, Restoration Juniper, and Tanoak

Also available: FSC Bigleaf Maple and FSC Douglas fir, Oregon White Oak, Walnut and Western Larch. Matching stair treads, risers, trim & vent covers made to order. Ask one of our wood enthusiasts for details.

Forest Stewardship Council® Certified since 2008
