# LOCAL WOOD FOR THE GREATER GOOD

**SUSTAINABLE NORTHWEST WOOD** is the bridge between responsible sourcing, beautiful local wood products and the built environment. Our mission is to foster a wood products community where each purchase for the built environment ensures resilience in the natural one.

**PLACE** Sourced from grassland and watershed restoration projects in Central-Eastern Oregon, primarily in the John Day area. The removal of juniper is restoring sensitive ecosystems and is supporting economic growth in rural Oregon.

**PURPOSE** Western Juniper is a native species that is incredibly rot resistant, making it ideal for direct ground contact applications. Ongoing OSU studies show that it outlasts both Cedar and Redwood. Restoration Juniper is a beautiful, character rich, and durable building material for residential and commercial landscape projects.

**PEOPLE** We partner with more than a dozen small businesses & sawmills in rural Oregon who provide our Restoration Juniper wood products. Your purchases support our local economy, ecosystems and communities.

**AVAILABILITY - Full Sawn Rough #2 Landscape Grade**

2" x 6", lengths 8' and 10'      2" x 8", lengths 8' and 10'

4" x 4", lengths 8'                      5" x 5", lengths 8' and 10'
