

## LOCAL WOOD FOR THE GREATER GOOD

### Sustainable Northwest Wood's **Canadian Western Red Cedar** **Select Knotty Grade** 1" & thicker, 4" & wider

**204.** There are two grades of Tight Knotted Stock: "**SELECT KNOTTY**" and "**QUALITY KNOTTY**" specified by the Canadian Lumber Standards Accreditation Board (CLSAB). We offer **SELECT KNOTTY**.

Knotty Paneling and Sidings (Dressed or Rough) stock may be shipped kiln dried, air dried or green and shall be well manufactured. Knots and other natural markings shall form the major characteristics of these grades. Paneling and Siding are one face grades. Unless otherwise specified, characteristics which do not interfere with the intended use are permitted on the reverse side.

"**Saw Texture**" is available in all grades of Western Red Cedar Knotty Paneling and Sidings and as the name implies is a rough finish put on the face of a piece to give it a textured finish. Material supplied with this finish shall in all ways adhere to the grades, sizes and patterns as specified, except that it shall be graded from the textured face.

#### **204a. "SELECT KNOTTY"**

Characteristics and limiting provisions are:

Checks	- small surface
Skips	- very light on back
Splits	- short in 5% of pieces
Torn Grain	- light
Warp	- very light
Knots	- sound tight; star checking and/or slight chipping permitted
Spike Knots	- approximately ½" the width
