Random lengths 12' and less for plates & studs

Re-think STD lengths - 3', 4', 6', 8', 10' 12' available

Complements our other FSC Certified Lumber offerings

**SANKOFA LUMBER**  
Wood With a Future

FSC Certified Since 2008

The mark of  
responsible forestry

*Every year more than 500,000 TONS of wood products are discarded from construction sites - in Oregon alone.*

**Thanks to Sankofa Lumber, this wood waste now has a future.  
And a story.**

Owner & Visionary Valerie Carey aspires to rescue and process **2 million board feet** of construction debris annually. Her company salvages usable material from construction sites in the Portland area. They de-nail and sort into lengths 3'- up to 12' and chop shorter pieces into pre-cut blocking, Perfect for those situations when standard lengths and new lumber are not needed.

This FSC ® Certified Recycled lumber reduces waste, conserves resources, provides labor cost savings AND utilizes wood waste at a time when demand for new lumber is at an all time high.

We strive to help you **Build with Purpose** and are excited to offer this **Local Wood for the Greater Good** in a 100% Recycled option to complement our full line of FSC Certified framing lumber.

Ask about optimizing your lumber package using this local, sustainable, recycled material in your upcoming projects!
