

# INTERIOR PANELING AND ACCENTS

Sustainable Northwest Wood offers a wide variety of interior paneling and wood accents for residential and commercial projects. From the rustic look of our Campground Blue Pine v-groove paneling to sleek hardwood slat walls and partitions, our paneling and wood accents add color, warmth, and a special story.

We stock traditional v-groove paneling and can quickly and affordably custom-mill a wide variety of profiles for architectural enhancements, commercial installations, and residential projects.

## PEOPLE & PLANET

From the sunny, arid forests of Eastern Oregon to the FSC® certified (FSC C041262) coastal woodlands in Southern Washington, the woods used for our interior paneling and accents are sourced from this region's many fertile forests. Ask us where yours came from—we can share the story behind each piece.
